

MATHEMATICS CLASSES IN PREPARATION FOR SEC EXAM IN MAY 2025

About

At STC Higher Education, we appreciate that failing an official Mathematics exam can be very tough for any student to handle, especially when this hinders progression. In view of this, we shall be offering students who are going to sit for their O Level Mathematics exam Paper 2B in May 2025, the opportunity to prepare themselves well under the guidance of an experienced and highly supportive Mathematics teacher.

The revision lessons will focus on strengthening understanding and increasing confidence in tackling exam questions. Emphasis will be placed on working out past papers and understanding what an examiner is looking for in an answer. Time management will also be given importance, since this can be key when working under exam conditions.

Class is limited to a maximum of 15 students to ensure individual attention and personalised support. The course is subject to a minimum of 7 students.

Our aim is to help you encounter success!

Other Information
